Education

Loughborough University — Loughborough, UK
MSci Computer Science — Year 1: 2:1 — *2024 – 2029*
- Modules: Software Engineering, Embedded Systems (Arduino), Distributed Systems, Data Mining, OOP, Python, Robotics, Cloud Computing

De Lisle College
A Levels: Computer Science (A), Mathematics (B), Physics (B), French (B) — *2017 – 2024*
- EPQ: 46/50 (A*) | GCSEs: seven 9s, one 8, two 7s, incl. Mathematics (8) and English Language (9)

Sciences Po (Institut d'études politiques de Paris) — Paris, France
French Language Course, Level B2–C1 (76.5%); DALF C1 planned for 2026/27 — *June – July 2026*

Experience

Computer Science Tutor — Feb. 2025 – Present
Freelance
- Taught students aged 9–18 Python, pseudocode and general computational thinking

Amazon Step-Up Programme — July 2025
Amazon Office — *Manchester, UK*
- Worked in a team under time pressure to conceptualise, cost and pitch a new product to senior buyers
- Completed professional networking and applications training with Amazon staff

Second Line IT Support — July 2023
Leicestershire County Council — *Glenfield, UK*
- Managed service tickets and resolved technical issues for an organisation of ∼5,000 staff
- Developed strong interpersonal skills supporting users with varying levels of technical ability

Distributor (Utility Warehouse) — Nov. 2024 – Present
Part-time roles alongside study
- Market broadband, energy and mobile packages, managing customer relationships and support issues

Projects & Hackathons

CERN LHC Rediscovering New Particles | *JupyterLab, Python, root files*
- Created an .ipynb notebook to analyse CERN's open source Large Hadron Collider collision data to discover the existence of certain particles after proton collisions, and graph them.

Performance Hall Event Manager | *Java*
- Developed an OOP-based GUI application to browse events, add tickets to a basket and complete purchases

Verbatim, iOS & Android App | *Swift, Kotlin, Firebase*
- Created a language learning app, first for android, then for iOS, called Verbatim.
- Connected with firebase in order to retain user data between devices. Used for DB, authentication and caching.

Accent Bias Voice Changer | *ElevenLabs API* | **1st Place**, Loughborough EDI AI Hackathon — 2025
- Built an ElevenLabs-powered voice accent bias changer with a teammate, winning first place
- Used the elevenlabs API to transcribe one voice and then regenerate into another voice effect, whilst keeping tonality and other factors.
- This also worked across various languages.

Technical Skills

Languages: Python (5+ years), Java, C, C++, PHP, SQL, JavaScript, HTML/CSS, Kotlin (Android), Swift
Frameworks & Tools: React, Flask, Git, Google Cloud, AWS (introductory), Arduino
Fundamentals: OOP, data structures, algorithms, complexity analysis, low-level programming (C)

Additional

Events/Courses: CS50 London 2025 (worked with Meta staff and the CS50 team); Harvard CS50x (2022)
Spoken Languages: English (native); French (CEFR B2–C1, fluent); Mandarin (HSK1, 170/200, beginner)
Reference: Available upon request.
